EDUCATION

Sharda University | Greater Noida, U.P **Bachelor of Technology** **Oct 2024**
Major: CSE Artificial Intelligence & Machine Learning CGPA: 7.8

TECHNICAL SKILLS

- Langchain
- Vector Store
- Flask
- Machine Learning
- LLM
- FastAPI
- Langgraph
- Python
- Data Science
- Scikit-learn
- Apex(Basic)
- Pandas
- Generative AI

EXPERIENCE

Software Engineer AI | Eastern Software Solutions, Noida | Full Time Oct 2024 - Present

- Working on generative AI, machine learning, and data science projects.
- Collaborating with teams to integrate AI solutions with Oracle Database.
- Developing and deploying models using Python, TensorFlow, Keras, and PyTorch.

Software Developer (AIML) | Ksolves India Pvt Ltd, Noida | Internship Feb 2024 - Aug 2024

- Contributed to Automation of an open-source framework for Generative AI in Data Science(Python)
- Worked on a live project focused on predictive analytics for customer churn.

PROJECTS

EVA Chatbot with Automated Data Insights, RAG, GPT | ESS Oct 2024 - Present

- Developed** an advanced chatbot, *EVA*, integrated with **LangChain** for seamless user interaction and natural language processing.
- Enhanced functionality** by automating data insights generation, utilizing **RAG (Retrieval-Augmented Generation)** with **Vector stores** and **LangChain** for real-time information retrieval from user manuals and large datasets.
- Implemented automated query handling** for natural language input, enabling dynamic execution of SQL queries on databases and Excel files using **LangChain** and **data science techniques**. Leveraging cutting-edge NLP techniques to simplify complex data access and insights generation.

Key Technologies: LangChain, RAG, Python, Vector Stores, Data Science, SQL, NLP, Langmith

NL2SQL System for Intelligent Database Interaction | Ksolves Apr 2024 - Aug 2024

- Developed** a Natural Language to SQL (NL2SQL) system using **machine learning** and **LangChain**, enabling users to interact with databases using natural language queries.
- Automated SQL generation** from user queries, retrieving relevant data and presenting it dynamically in the form of **Tables**, **PDF reports**, **graphs**, and **summaries** for enhanced user comprehension.
- Integrated Python-based tools** to process complex queries, providing accurate results and visualizations while improving data accessibility and decision-making.
- Enhanced system performance** by implementing **machine learning models** and leveraging **LangChain** for natural language understanding and query execution.

Key Technologies: LangChain, Machine Learning, SQL, Python, Data Visualization, NLP, FPDF

CERTIFICATIONS

- AWS Academy Machine Learning Foundations
- AWS Academy Cloud Foundations
- Oracle Database Management
